PROFESSIONAL SUMMARY

Data Engineer with 3+ years working on ETL pipelines and cloud data platforms — mainly Azure (Azure Data Factory, Databricks, Synapse), Snowflake, and AWS. At Walmart, built ingestion and transformation layers for an ADLS Gen2 data lake covering 10+ retail systems, tuned PySpark jobs to run 35% faster, and helped move legacy batch jobs to Kafka-based streaming, lifting throughput 40%. Comfortable owning a pipeline from raw data to reporting.

TECHNICAL SKILLS

- **Cloud & Warehousing:** Azure (Azure Data Factory/ADF, Databricks, Synapse, ADLS Gen2), Snowflake, AWS (Redshift, S3)
- **Big Data & Streaming:** PySpark, Spark SQL, Kafka, Event Hubs, Hive, HDFS
- **Languages:** Python, SQL, Bash
- **Orchestration & DevOps:** Airflow, Azure DevOps, Docker, Git, CI/CD
- **Data Modeling:** ETL/ELT, Dimensional Modeling (Star/Snowflake Schema), SCD Type I/II, Lakehouse, Partitioning, Parquet, ORC
- **BI & Tools:** Power BI, dbt, Jupyter, Jira.
- **Core Competencies:** Data Warehousing, Data Pipeline Development, Data Integration, Data Governance, Agile/Scrum, Problem-Solving, Stakeholder Communication, Time Management, Adaptability.

PROFESSIONAL EXPERIENCE

DATA ENGINEER — Walmart, USA

Jul 2025 – Present

- Built ingestion and transformation layers for a cloud data lake on ADLS Gen2, bringing together 10+ retail source systems and centralizing reporting for 50+ stakeholders.
- Developed 20+ automated ETL pipelines in Azure Data Factory, cutting out 15 hours/week of manual reconciliation.
- Moved legacy batch workflows to event-driven pipelines on Kafka and Event Hubs, increasing throughput 40% on high-volume transactional data.
- Optimized PySpark job performance through partitioning and join tuning techniques, accelerating execution efficiency by 35%.
- Put forecasting and anomaly detection models (Prophet, Isolation Forest) into production pipelines, reducing inventory discrepancies 25%.
- Mentored 3 junior engineers on Airflow DAG design and Spark best practices, improving team delivery velocity by 20%.

DATA ENGINEER (INTERNSHIP) — Walmart, USA

May 2024 – Dec 2024

- Supported migration of retail datasets from on-prem SQL Server to Snowflake using Snowpipe and micro-partitioning, reducing query latency by 30%.
- Built end-to-end ETL workflows using PySpark and Azure Data Factory, processing 2TB+ daily batch loads with 99.5% uptime.
- Established automated data validation checks and unit testing using Python, resolving data discrepancies across 3+ downstream systems.
- Coordinated with senior engineers to diagnose pipeline failures, reducing mean time to resolution by 40% and improving workflow reliability.

DATA ENGINEER — Maxgen Technologies, India

Aug 2021 – Jul 2023

- Migrated legacy ETL from on-prem SQL Server and Teradata to Spark workflows, improving daily job reliability 27%.
- Ingested and transformed 5TB/day of transactional records on HDFS with zero data loss.
- Designed a data quality validation framework using Python and Hive, achieving 99% data integrity across 5M+ records.
- Implemented Star and Snowflake schemas with SCD Type II, speeding up downstream analytics delivery 20%.
- Reduced storage costs by 20% by adopting Parquet and ORC formats with Snappy/Gzip compression strategies.

PROJECTS

ENTERPRISE SALES PERFORMANCE INTELLIGENCE ENGINE Azure Synapse · Power BI · SQL

- Developed a real-time analytics engine unifying CRM, sales, and financial data through Azure Synapse and Power BI.
- Generated KPI dashboards with predictive scoring models that improved quota attainment by 19%.

HEALTHCARE ANALYTICS & DRUG SAFETY DASHBOARD Azure ADLS · ADF · Snowflake · dbt · Airflow · Power BI

- Constructed an end-to-end pipeline integrating CMS Medicare and FDA API data into ADLS with Snowflake and dbt transformations.
- Automated drug safety KPI reporting and operational alerts, cutting manual effort by 80% and improving clinical visibility by 35%.

EDUCATION

UNIVERSITY OF MASSACHUSETTS DARTMOUTH

May 2025

M.S., Data Science

Dartmouth, MA

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02)
- Azure Fundamentals certification (AZ-900)
- Snowflake SnowPro Core certification (COF-C03)
- AWS Certified Data Engineer - Associate (DEA-C01)
- Microsoft Certified: Fabric Data Engineer Associate (DP-700)
